Introduction

We have written these guidance notes to help you fill in the health and housing support needs assessment.

These notes are set out in the same order as the application form, and give you some examples of the type of information we need under each heading. Please try to give us as much information as you can. This will help us make sure we have the right information to assess your priority for housing.

In some circumstances, we may need to get more information on your health condition or on how it affects you. If we need to do this, we will contact the relevant person from Health and Social Care.

Data Protection

Protecting Your Information

We are committed to protecting your privacy in line with the requirements of the Data Protection Act 2018 as amended by the General Data Protection Regulations (GDPR). We will keep all of the information you give in this form, and any documents connected with it, on a computer system for the common housing register. Your chosen partner landlords will be able to use this information to assess your housing, health and support needs.

In addition we may use this information where appropriate to discharge any statutory functions or requirements placed on us under the Housing Scotland Act 2001 as amended and any other relevant legislation.

You can access the Common Housing Register Privacy Statement at www.northlan.gov.uk or on any of the partner landlords websites.

There may be times when your health is better than usual and times when it is worse. For example, if you have a long-term mental-health problem, there may be times when you are feeling well. 3 Medical information

We ask you whether you consider yourself to be disabled. The The Equalities Act 2010 defines disability as 'a physical or mental impairment which has a substantial long-term adverse effect on his / her ability to carry out normal day to day activities'.

This means a physical or mental problem which has a major effect on your ability to carry out day-to-day activities such as eating, washing, walking and going shopping. The problem must have lasted, or be likely to last for, at least 12 months, and must affect how well you can move around, speak, hear, see or remember information.

If you have a sight or hearing problem, you may have difficulties in your current home. We may be able to give you advice about how you can deal with these difficulties, such as using equipment and making adaptations to your home. Sometimes the layout of your home might make things difficult for you.

Maybe the way your current home is laid out is not helpful, for example the doors are not wide enough or they open the wrong way. Or, maybe there is not enough space in the bathroom, bedroom or kitchen for you and your family or carers to give you the help or support you need.
